About Wallace

CHICAGO The intriguers and connivers who are yapping at Henry Wallace's heels serve merely to increase his stature. A shy, shambling figure, he stands tall above the prairie that is his home.

Whether he can save himself in the convention is very doubtful. Whether he should try to hold on to an office that has brought him nothing but grief and may bring him disaster to my way of thinking, even more doubtful.

His strength lies in his ability to catch hold of men's minds; to fire the heart and stir the imagination. The very hatreds he arouses are tribute to that capacity, for those who bate him recognize he is the prophet of a truly Democratic America.

There is about him something of an earlier America. Walt Whitman would have recognized him as an original American. Wallace would have been at home at Brook farm. in that New England which welcomed ideas and ideals.

WHEN THE CAPTAIN COMMANDS A COMBAT TEAM OF Salesmen

* Today, Captain Lee's orders hurl tons of high explosives at the enemy. Tomorrow, when the last "cease firing" order has been given, the Captain will resume his peacetime command as sales manager ... guiding his team of salesmen.

War has taught the Captain many things ... leadership, comradeship and reliance on others. As a fighter, he depends on the Service Forces for food, ammunition . . . all the supplies needed to keep his unit going. As a leader of salesmen, he will look to another service force - the railroads - as a major means of peacetime supply.

Today, the Baltimore & Ohio is serving the Captain and his men in their fight for freedom. Tomorrow, we shall be prepared to serve him in business. In the B&O he will find an able organization with vast facilities-70,000 workers and 11,000 miles of trackprepared to give rail service fitted to his postwar desires for speed, convenience and safety.

FRONT LINE PATROL

Front Line Patrols operate all over the world. The attack is spearheaded . . . information is relayed . . . the battle goes on . . .

Because effective lines of communication are established.

These men need communications equipment in vast quantities - and are getting it.

They are getting it because peace-time manufacturers of telephone facilities are turning out war communications equipment almost exclusively. And, there is no let-up in the demands of war. The Army

and Navy need nearly everything we can

Production of telephone equipment for everyday civilian needs has all but stopped. "Margins" built into the telephone plant are just about used up.

This is why there aren't enough telephone facilities to go 'round-why the "waiting lists" for telephone service are lengthening daily.

But, there can be no "waiting lists" for our fighting men - the men who are on "Front Line Patrol."

A record assembly of 440 youths were on hand at Forbes field today in response to the call to the annual baseball school conducted by the Pittsburgh Pirates.

Club officials reported the number of would-be big league players was actually higher, but that a number appeared without uniforms and some of them did not register.

Meet SAM ADAMS, Your Home Front Quariermaster*

"MAYBE you don't realize it, but your grocer has a whale of a lot of problems these days. Yet he always tries to give you the best possible service, and to help you plan good, wholesome meals. He's a real friend of yours-and he's doing a swell job.

"One of the foods your grocer recommends is Bell Enriched White Bread. He knows it's delicious, nutritious, and packed with vitamin and mineral factors. What's more, it helps make hard-to-get foods go further when you use it in cooking.

"When you visit your neighborhood grocer today, ask him for Bell Enriched White Bread. And tell him how much you appreciate the help he gives you in solving wartime food problems.
